Date	Name	Tasks Done Today	Plan for Tomorrow	Any Impediments?
11-18	Peter Yan	Made changes to student_complaint_activity that led to a crash. Tried to resolve the issue of app terminating, did not succeed	Continue resolving the issue	App terminating
11-18	Leo Yang	Finished the UI for login and sign up	Finish the back end code for basic login and sign up and exception handling	None
11-18	Edward Zhang	Finish Layout for Student Page and Associated Activities	Will try to finish the student page	
11-18	Benjamin Lu	Worked on code for student feedback page and corresponding .xml layout file	Will try to finish	App not running properly when trying
11-18	Benjamin Chang	None		
11-19	Peter Yan	Resolved the issue of app terminating, merged and adopted new code techniques from Leo for writing data to firebase, made an activity transition from student home page to student complaint page that led to bugs, wrote code that writes to firebase, which allows student users to	Will fix the page-switching from student home page to complaint page	Conflicting code between default and manual page-switching using intent().

		submit complaints		
11-19	Leo Yang	Finished the back end functionalities for login and sign up	Finish the admin signup and log in activity	Bugs relating to the switch event, will figure out soon
11-19	Edward Zhang	Finished the functionality for Post Checker Page	Finish up the functionality for Profile and Edit Profile Page	
11-19	Benjamin Lu	Attended weekly meeting to help understand where everyone else is on project, ask to meet with Edward and work closely together for student pages	Continue working on student event feedback page	None
11-19	Benjamin Chang	None	Admin Page	None
11-20	Peter Yan	Fixed the app crash by deleting and re-creating an emulator	Continue working on the student complaint page	None
11-20	Leo Yang	Resolved a bug relating to the Switch event, and implemented admin signup/login, and restructured Firebase user data structure. After a successful login, if the system detects that you're an admin user, you will be taken to AdminActivity instead of MainActivity.	More miscellaneous changes, such as password encryption, reject user signup if username/email already exists, etc.	None
11-20	Edward Zhang	Got it to display the student email and name, will	Implement functionality to edit profile	

		implement edit profile tomorrow		
11-20	Benjamin Lu	Properly cloned project since it wasn't cloned correctly the first time, finished basic layout for the student event feedback page, resolved some issues with running app/viewing my work.	Work on main event page	None
11-20	Benjamin Chang	Finished ui for admin page and toolbar.	Subpages of admin and functionalities of toolbar.	
11-21	Leo Yang	Researched on password encryption methods	Encryption implementation	None
11-21	Peter Yan	Linked student complaint page to main activity	Will push to github and sync up with the group	None
11-21	Edward Zhang	Got Edit Profile to display text changes	Update it so that the changes update to Firebase as well	
11-21	Benjamin Chang	Finished Admin page and functionalities of toolbar	Combine admin page and student page together and showing corresponding page when different users	
11-21	Benjamin Lu	Studied for stab52	Need to begin work on Student event page, feedback form after test	n/a

11-22	Benjamin Chang	Finsished everything in both dashboards	Announcement page	Firebase disconnects after switching ip
11-22	Peter Yan	Finished syncing up with the group, linked my student complaint page with Ben Chang's menu page.	Now need to work on notifications on the admin's side to receive the student complaints.	Need to research on how to create notifications and read from database.
11-22	Leo Yang	FInished additions of additional feature: dupe username/email now gets rejected from sign up	Add restrictions on username creations, password encryption etc.	None
11-22	Edward Zhang	Finished up the functionality of edit profile that updated firebase	Work on layout of pages	
11-22	Ben Lu	Studied for stab52	Check in with rest of group	n/a
11-23	Peter Yan	Studied for stab52	n/a	n/a
11-23	Ben Chang	Finished menu bar everywhere	Optimize design of code	
11-23	Leo Yang	Added restrictions on duplicate usernames and emails in signup	Continue looking into authentication	None
11-23	Edward Zhang	Work on layout of pages	Add functionality to postchecker page so that it changes colors upon qualify unqualify	
11-23	Ben Lu	Studied for stab52	Work on functionality for student event	n/a
11-24	Peter Yan	stab52	n/a	n/a
11-24	Ben Chang	Optimized design	Announcement	Need to figure

		of MenuActivities	Page	out how to refactor two profile activities that have different menu but sharing method
11-24	Leo Yang	Deleted some unused files, looked into MVP method	Refactor the current code	Need to figure out how to refactor without breaking the functionalities
11-24	Edward Zhang	Fixed bug regarding edit profile and firebase	Implement color change feature for post checker	
11-24	Ben Lu	Studied for stab52	Work on functionality for student event page and StudentFeedback	n/a
11-25	Peter Yan	stab52	Finish student complaint feature, be able to read from firebase so that admins can see the complaints	Need to know how to read form firebase
11-25	Ben Chang	stab52		
11-25	Leo Yang	Prepared for co-op interview	Continue to refactor the code	N/A
11-25	Edward Zhang	Added color change functionality	Finish up edit profile	
11-25	Ben Lu	Started working on implementing functionality for student event page and Student Feedback	Finish up, and push	N/A
11-26	Peter Yan	Completed student	Fix the bug so	Need to

		complaint feature. Admins are also able to see (only) one student complaint due to a bug	that admins can see all student complaints	structure the database tree so that i don't sort alphabetically, and also need to show all student complaints in the page.
11-26	Ben Chang	Implementing the schedule-event feature for admin-student interaction	Announcement feature for admins	
11-26	Leo Yang	Refactored the code into MVP, however a lot of bugs and functionalities broke	Rewrite the refractor	Bugs related to the new refactored code
11-26	Edward Zhang	Finish up edit profile	Look for bugs	
11-26	Ben Lu	Finished student feedback form functionality, attended weekly group meeting	Need to make the feedback get stored on firebase	Need to figure out how to work in my existing code with firebase implementation.
11-27	Peter Yan	Helped Ben Lu use github to sync up with the most recent project files.	fix the bug so that admins can see all student complaints	Need to know how to order data tree by chronological order
11-27	Ben Chang	Admin send-announcement feature	Do the review event feedback for admins	
11-27	Leo Yang	Looked a bit more into authentication, and continue to refactor the code	Finish fixing bugs relating to refactoring	None
11-27	Edward Zhang	Caught up to coursework, got up to date for project	n/a	

11-27	Ben Lu	Caught up on other course assignments/work, slight start. Got everything up to date on my end in terms of project files.	Get my code working with firebase	Not so familiar with firebase, need to get some base knowledge
11-28	Peter Yan	Restructured the complaint recyclerview, now the page starts crashing	Keep fixing the bug	Keep fixing the bug
11-28	Ben Chang	Started on the review event feedback for admins	Finish remaining admin announcement and event features	n/a
11-28	Leo Yang	Refactored LoginActivity to use MVP method	Continue to refactor to make it more in line with MVP	None
11-28	Edward Zhang	Updated layout for postchecker	Look for bugs	
11-28	Ben Lu	Finished getting feedback stored when student submits form.	Check in with group, improve how the event page looks like	n/a
11-29	Peter Yan	Restructured the way I store student complaints, refactored the complaints recycler view, now all complaint items are visible in the admin's "review comments" page	Implement the announcement inbox feature	none
11-29	Ben Chang	Finished announcement pasge	Start event page	
11-29	Leo Yang	Login completely refactored, looking	Implement auth/encryption	None

		into auth/encryption	into login/signup	
11-29	Edward Zhang	Discovered a bug where the user profile no longer displays name if repeatedly go to it.	Fix scrolling issue edit profile	
11-29	Ben Lu	Met with group during lab, discussed next steps	Need to make sign up button look more presentable	n/a
11-30	Peter Yan	Started on announcement inbox	Finish announcement inbox	
11-30	Ben Chang	Finished everything view feedbacks of event feature		
11-30	Leo Yang	Implemented hashing encryption to password. Password is no longer directly visible on the database	Look into login JUnit testing with Mockito	None
11-30	Edward Zhang	Fixed Scrolling issue for edit profile	Fix bug regarding post qualifications discovered by Peter	
11-30	Ben Lu	Caught up with other course work	Continue work with sign up for events	n/a
12-01	Peter Yan	Finished student inbox feature, discovered a bug that does not display user-specific announcement "read status"	Need to fix this bug by doing a firebase join. Handed this task over to Ben Chang.	The bug as described
12-01	Ben Chang	Debug		

12-01	Leo Yang	Started working on Mockito JUnit testing, however ran into an issue where build keeps failing	Investigate and fix the issue	Unknown where the issue lies within the testing code or Mockito
12-01	Edward Zhang	Fix bug regarding color change in post qualifications	Add go back button for post checker page	
12-01	Ben Lu	Changed signup button to be more clear	Check in with group to help with remaining tasks	n/a
12-02	Peter Yan	Fixed all editable texts in the app to be non editable where needed. Implemented date/time features for the complaint and inbox recyclers	Need to start wrapping up the project	
12-02	Ben Chang	Debug		
	Leo Yang	Discovered that the Mockito version given in the Demo is incompatible with our current SDK/JUnit, imported a newer version of Mockito and continues to work on JUnit tests	Finish JUnit tests and look for any other additions or errors that needs changes	None
12-02	Edward Zhang	Added Go back button and dealt with issue regarding edit profile		
12-02	Ben Lu	Pulled most recent version, merged properly	Finish up changes, push to github	n/a
12-03	Peter Yan	Fixed remaining	Will finalize	Wrapping up

		bugs, meeting with the group to finalize, discovered more bugs	everything	
12-03	Ben Chang	Added home button in menu		
12-03	Leo Yang	Fixed an issue where the entire project won't build due to having too much methods. Modified signup so it rejects sign up attempts if input is invalid (ie. username is not lowercase alphanumerical, etc.)	Finish up project	None
12-03	Edward Zhang	Try to Fix Menu bar issue	Check with group to wrap up project	
12-03	Ben Lu	Removed needless features in feedback page for clarity, pushed to github	finish	n/a
12-04	Wrap up	Final demo, zip
